

UVV100

UVC-FACE SHIELD

The UV-C full-face shield serves as a reliable barrier for the safe execution of UV-C measurements.

Application Note

Protect eyes and skin before operating UV-C radiation sources. The UV full-face shield is part of the personal protective equipment (PPE) required for commissioning, servicing and maintenance of UV-C radiation sources

Function

The UV-C face shield features a large protective visor that provides an unobstructed field of view when handling UV-C emitters. An adjustable ratchet fastening system allows individual fitting for the wearer

The UV-C face shield offers reliable protection against UV-C radiation with a wavelength of 254 nm. Tested according to EN 166

Features

Tinted protective visor with a height of 250 mm; upward flip mechanism; ratchet fastening size 50–64; design with absorbent terry sweatband; chin guard made of ABS; headgear is resistant to chemicals and heat
